WHO WE ARE

ABOUT OUR COMPANY

1 About VOGUE SOFTWARE SOLUTIONS

Founded with a vision to empower businesses through secure and innovative technology, Vogue Software Solutions (Pvt) Ltd began its journey as a trusted IT partner. From humble beginnings in application and operating system support, the company quickly grew to become a leading provider of end-to-end IT solutions, specializing in cybersecurity, email migration, SSL certificate implementation, and more. Our journey has been defined by a commitment to quality, security, and customer satisfaction. Over the years, we've partnered with businesses across various industries, helping them overcome IT challenges and achieve seamless digital transformation.

2 Our Team

At VOGUE, we pride ourselves on being uniquely positioned to attract and hire only the most talented IT professionals. Our team comprises seasoned industry specialists with decades of experience across diverse IT domains, ensuring our customers receive the best-in-class expertise and innovation. By hand-picking top talent, we guarantee a commitment to quality and reliability in every service we deliver.

ABOUT OUR COMPANY

Vision

Helping Brands Across Industries Achieve Their Goals

Mission

01

Simplifying Business Operations

"We understand that managing a business can be challenging, and we are here to make it easier by providing tailored software solutions that streamline your operations."

02

Enhancing Customer Experience

"Our solutions are designed to improve customer engagement and satisfaction, helping you attract and retain more customers."

03

Providing Comprehensive IT Support

"We offer a wide range of IT services, from application support to operating system management, ensuring your business runs smoothly and efficiently."

04

Driving Business Growth

"Through our innovative and secure IT solutions, we empower businesses to grow, adapt, and thrive in an ever-changing digital landscape."

OUR VALUES

VOGUE's Core Values

Innovation
Constantly seeking new and better ways to deliver IT solutions.

Excellence
Striving for the highest quality in everything we do.

Customer - Centricity
Prioritizing customer needs and satisfaction.

Integrity
Operating with honesty and ethical practices.

Collaboration
Working together to achieve shared goals.

Global Perspective
Embracing diversity and understanding different cultures.

Why VOGUE ?

01

Proven Track Record

We've delivered some of Sri Lanka's most impactful and high-scale IT projects.

02

End-to-End Expertise

From software development to infrastructure and networking, we cover it all.

03

Custom Solutions for All

We build tailored systems for both enterprise clients and growing businesses.

04

Innovative Thinking

We bring fresh ideas and modern technologies to every solution we design.

05

Strong Local Presence

We understand Sri Lankan business needs better—because we've built for them.

06

Committed Support

Reliable, responsive, and dedicated assistance to ensure your systems run smoothly—whenever you need it.

GLOBAL STRATEGY

Market Penetration

As a growing startup, we work hard to deliver high-quality solutions. Vogue Software Solutions is expanding across Sri Lanka, meeting local business needs with smart, tailored technology.

Strategic Alliances

At Vogue Software Solutions, we believe teamwork leads to better solutions. We partner with other experts to improve our services and reach more businesses in Sri Lanka. These partnerships help us work faster and keep up with new technology.

Knowledge Empowerment

VOGUE enables its teams and clients with the skills, resources, and technology needed to thrive in the evolving ICT environment.

Focus Areas by Country:

Sri Lanka:

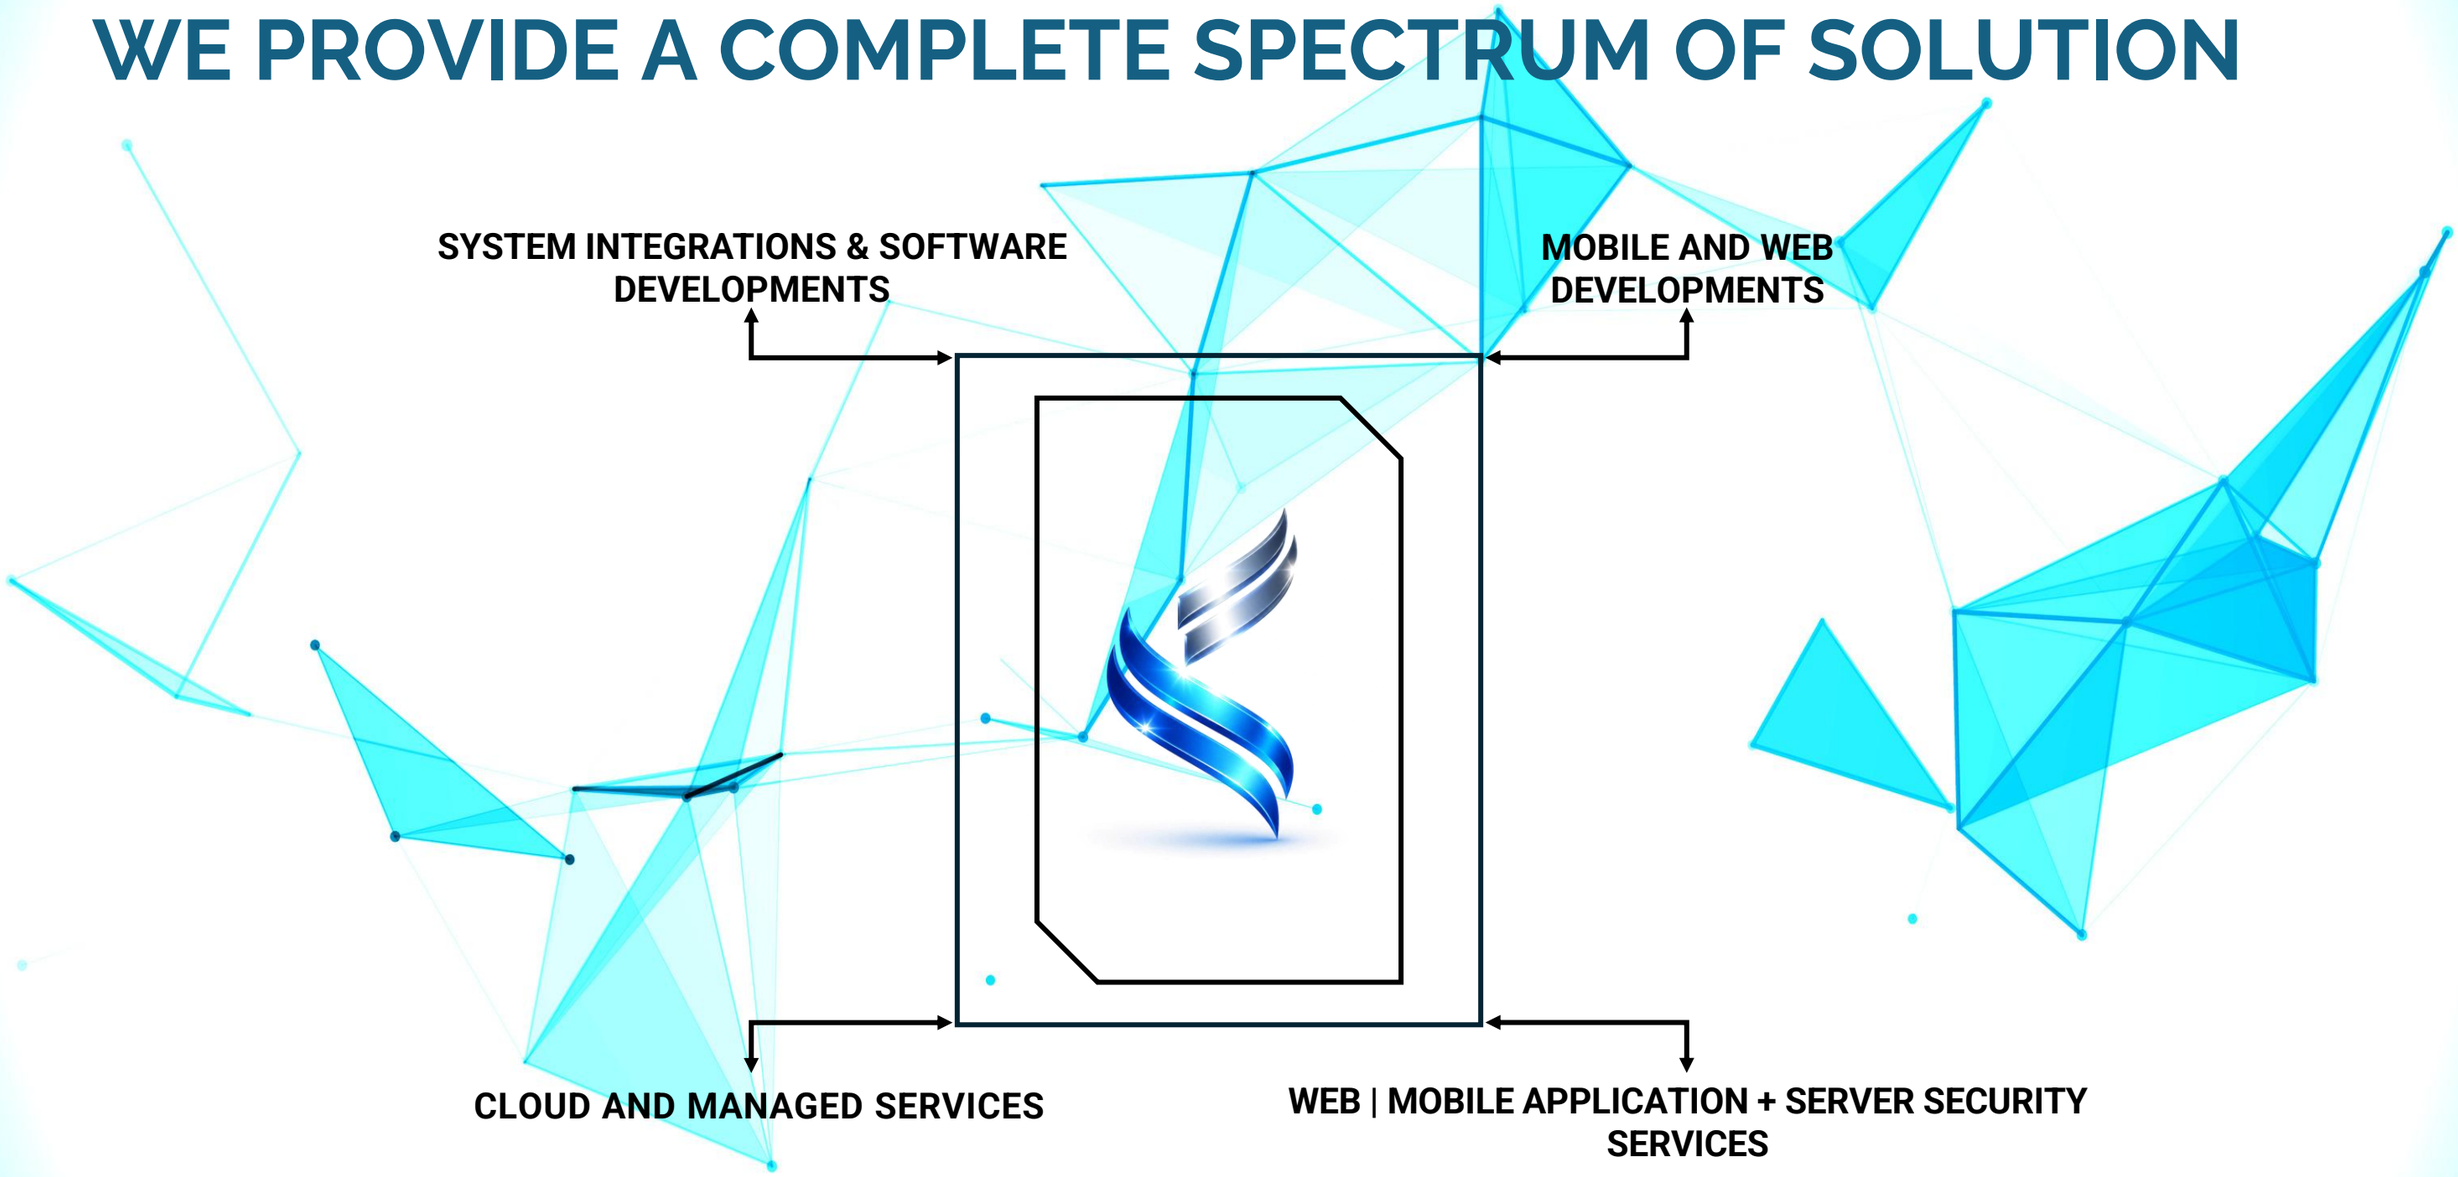

Supporting Sri Lanka’s hospitality sector, all financial and non-financial institutions, as well as small businesses and large enterprises, with technology and infrastructure comprehensive solutions tailored to meet evolving business needs.

Australia:

Primarily supporting staff augmentation, managed services, and BPO solutions.

WE PROVIDE A COMPLETE SPECTRUM OF SOLUTION

WHAT WE DO

Web | Mobile Testcase Handling Emulator services

Automation Services

Business process automation | Report generation automation | Test automation

Cloud Solution

Azure | Amazon | Google | Ali Cloud | Huawei

Backup & Recovery

Data Protection | Backup Solutions | Archiving | Disaster Recovery

AI-Powered Solutions

Chatbots for support | Predictive analytics | Virtual assistants

Monitoring & Reporting

Data Center Monitoring | Environment Monitoring | Network Monitoring

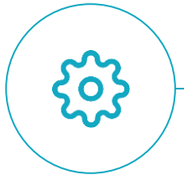

WHAT WE DO

OUR SERVICES

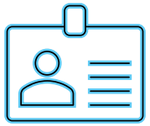

Application Security

Internal Firewall | Web Gateway | IAM | MFA | Database Monitoring & Scanning Application | Security Testing & Management

Security Management

- Server Hardening Services
- Vulnerability Assessment & Penetration Testing (VAPT)
- Application vulnerability assessment and remediation (provided the source code is available)
- OS-level vulnerability assessment and remediation

Outsourcing Services

Staffing & Employee Outsourcing Services | Onsite & Offsite Staffing

OS Upgrade Solutions

- Linux 7.x to 8/9 upgrades (RHEL, CentOS, Rocky, AlmaLinux)
- CentOS 7 to CentOS 9/10 upgrades
- Application migration & compatibility handling
- Minimal downtime planning & rollback support

WHAT WE DELIVER

SERVICE SCOPE

SECURITY

- **Network Security Services**
  Email security · Network access control · Zero Trust Network Access · Secure Access Service Edge · Data Center Security
- **Cybersecurity Awareness Sessions & Solutions**
- **Application Security Services**
  Web Application Firewall · Database Monitoring/Scanning · Multi-Factor Authentication
- **Data Security**
  Data Classification · Data Loss Prevention · Encryption · Identity Access Management · Integrity Monitoring
- **Cloud Security**
  Cloud Firewall · Cloud Email Gateway · Cloud Data Loss Prevention · Cloud Archival · Cloud Backup & Recovery · Cloud WAF

DEVELOPMENTS

- **Password Wallet Services**
  Secure credential storage · Team password sharing · Access control management
- **HR – Active Directory Integration Services**
- **Custom API & Module Development**
- **AI-Powered Solutions**
  Chatbots for support · Predictive analytics · Virtual assistants

INFRASTRUCTURE

- **Backup and Data Security as a Service**
  Backup/ server backup/ cloud backup
- **Virtualization as a Service**
  Vmware/ Nutanix/ HCI/ hyperV/ citrix
- **Cloud Infrastructure Solution as a Service**
  Private cloud/public cloud
- **Data Center Monitoring as a Service**
- **Linux Managed Services**
- **OS Upgrade Solutions**
  Linux 7.x to 8/9 · CentOS 7 to CentOS 9/10
- **Email as a Service**

FEATURED SERVICE · OPERATING SYSTEMS

Minimal downtime planning & rollback support

FEATURED SERVICE · SECURITY MANAGEMENT

Vulnerability Assessment & Remediation

APPLICATION LEVEL

Application vulnerability assessment and remediation

Assess applications for vulnerabilities and remediate what is found, provided the source code is available.

ASSESS → REMEDIATE

SOURCE CODE AVAILABLE

OPERATING SYSTEM LEVEL

OS-level vulnerability assessment and remediation

Assess operating systems for vulnerabilities and remediate them, keeping servers secure and supportable.

ASSESS → REMEDIATE

PAIRS WITH OS UPGRADES

Pair assessment and remediation with planned OS upgrades, keeping servers secure and supportable.

Enterprise Software Solutions

We provide powerful and user-friendly Enterprise Software Solutions designed to streamline operations, improve efficiency, and drive digital transformation across your organization. Whether it's managing business workflows, automating processes, or integrating key systems, our solutions are built to support departments such as operations, finance, HR, IT, and customer service. With scalable architecture, intuitive interfaces, and seamless integration capabilities, we help businesses operate smarter, faster, and with greater agility.

Languages & Technologies We Specialize In:

OUR CUTTING-EDGE SOLUTIONS:

01
HR & ACTIVE DIRECTORY INTEGRATED USER MANAGEMENT API

02
WEB & MOBILE APP TESTING WITH AUTOMATED EMULATORS

03
AI-POWERED CHATBOTS & ASSISTANTS

04
TRX ENGINE (ATM SWITCH) ERROR MANAGEMENT ANALYZER

05
PAYMENTS RECONCILIATION AND REPORT HANDLING BOTS

RESOURCING

Staffing & Employee Outsourcing Services

We provide reliable and flexible **Employee Outsourcing Solutions** designed to optimize workforce management, enhance productivity, and support your business growth.

Temporary Staffing Solutions 01

Quickly scale your workforce for short-term projects, seasonal demand, or peak periods.

Permanent Recruitment Support 02

Source, screen, and supply skilled professionals to join your team long-term.

Managed Workforce Services 03

Full HR management of outsourced employees, including payroll, attendance, and compliance.

Project-Based Teams 04

Supply specialized teams for IT, finance, marketing, or operations projects.

Onsite & Offsite Staffing 05

Deploy employees at your location or manage remote staff for seamless integration.

Compliance & HR Administration 06

Ensure legal and regulatory compliance while we handle employee contracts and benefits.

PRODUCT 09 · RESOURCE SERVICES

IT Staff Augmentation

& Resource Outsourcing

ROLE 01

SE

SOFTWARE ENGINEERS

Architect and build scalable, secure enterprise systems and platforms.

ROLE 02

SD

SOFTWARE DEVELOPERS

Hands-on delivery across web, mobile, API and back-end development.

ROLE 03

PM

PROJECT MANAGERS

Plan, govern and deliver projects to scope, schedule and budget.

ROLE 04

IT

IT PROJECT MANAGEMENT RESOURCES

Technical specialists who keep technology programs on track.

WHY AUGMENT WITH VOGUE

SCALE YOUR TEAM AS THE WORK SCALES

Add proven engineers, developers and project leaders to your team in the structure that suits you, and grow or reduce capacity as delivery demands change.

ENGAGEMENT MODELS

1. Temporary staffing
2. Permanent recruitment
3. Managed workforce
4. Project-based teams
5. Onsite & offsite
6. Compliance & HR admin

Skilled talent
Hand-picked engineers and project leaders

Flexible allocation
Resources matched to each engagement

Delivery support
Dedicated help to land projects on time

Scalable teams
Scale up or down as requirements change

CLOUD

Enterprise Cloud Services

We offer end-to-end **Enterprise Cloud Solutions** tailored to meet the evolving infrastructure, scalability, and security needs of modern businesses. From public and private cloud deployments to hybrid and multi-cloud strategies, we help organizations move faster, reduce costs, and stay agile in a digital-first world.

1 Cloud Migration

VOGUE offers comprehensive cloud migration services to help businesses seamlessly transition their IT infrastructure to the cloud.

2 Infrastructure Management

VOGUE provides robust infrastructure management and security services to ensure the stability, performance, and protection of cloud environments.

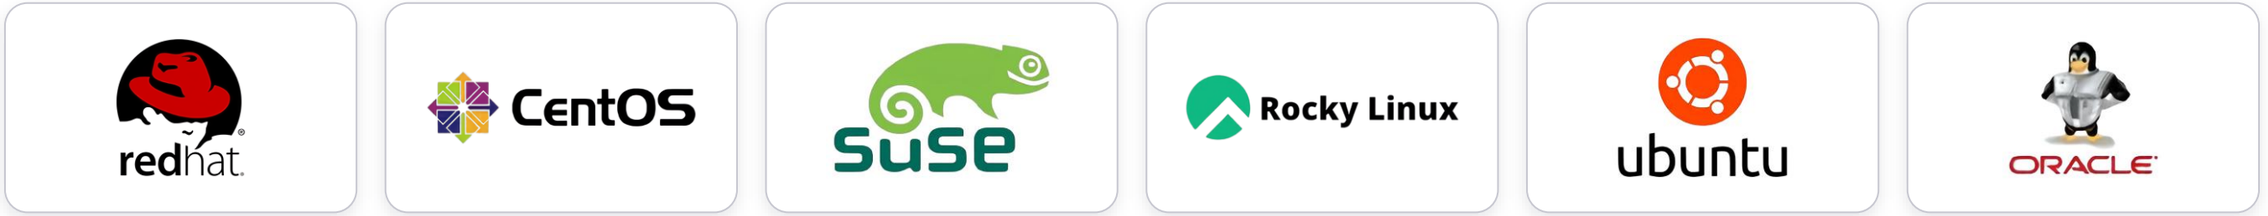

3 Scalability and Optimization

VOGUE's cloud solutions are designed to optimize resource utilization and cost savings, ensuring businesses have the resources they need to grow and adapt.

- Public
- Private
- Hybrid
- Multi-cloud

Enterprise Linux & Web Application Support

We provide **comprehensive Enterprise Linux Support and Web Application Maintenance** designed to ensure smooth, secure, and high-performing IT operations. **Whether you are running critical applications on various kinds of Linux distributions**—including Red Hat, Ubuntu, CentOS, SUSE, Oracle Linux, and more—or managing web-based platforms, our services support IT, operations, finance, HR, and other business-critical departments with reliability and efficiency.

WE DO PROVIDE :

01 Linux System Management

Installation, updates, patching, performance tuning, and troubleshooting for all Linux servers.

02 Web Application Maintenance

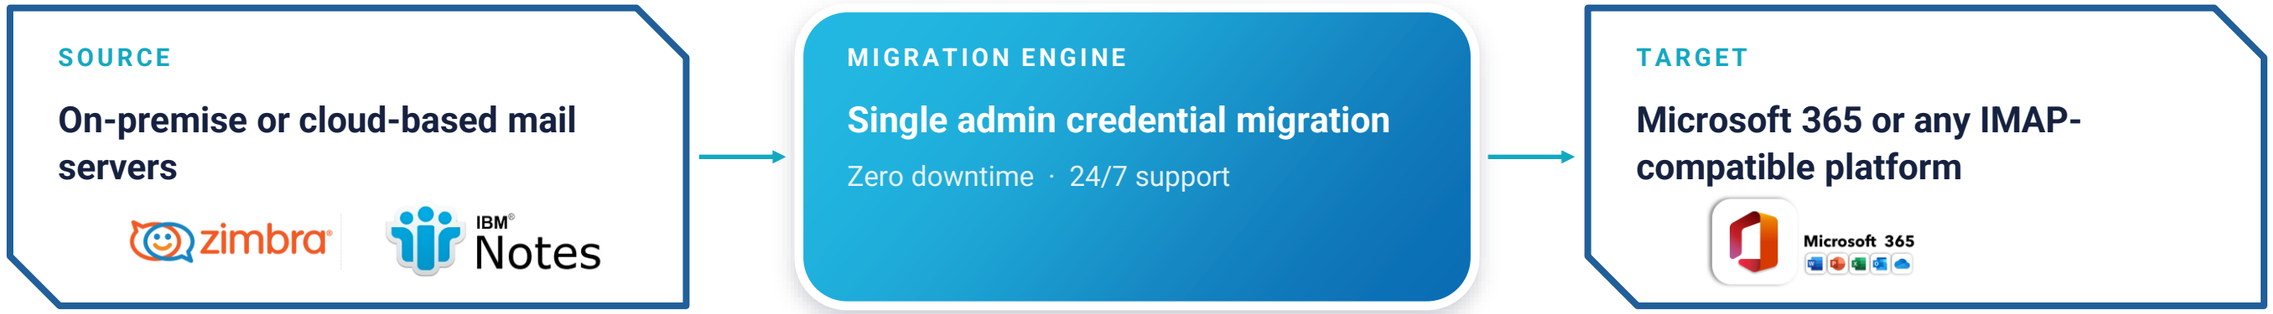

Continuous monitoring, bug fixes, security updates, and performance optimization for smooth operations.

EMAIL

Enterprise Mail Migration Service

Our Enterprise Mail Migration Service allows organizations to migrate emails from on-premise or cloud-based mail servers to Microsoft 365 or any IMAP-compatible platform—quickly, securely, and with zero downtime. Unlike typical third-party tools, we offer 24/7 support and complete end-to-end delivery, ensuring a smooth transition with no impact on business operations.

Our solution seamlessly integrates with major enterprise platforms including **Microsoft Exchange, Office 365, IMAP servers**, and other custom mail environments.

WHAT MAKES US DIFFERENT:

- **First-Ever Single Admin Credential Migration Engine**
- **Dedicated 24/7 Support**
- **Secure & Reliable**

MOBILE

Mobile Application Development Service

Our Mobile Application Development Service empowers businesses to design and launch high-performance mobile apps across platforms—efficiently, securely, and with a smooth delivery experience. Whether you're building from scratch or modernizing an existing app, we offer end-to-end development tailored to your business goals.

We specialize in cross-platform development using **Flutter, Dart, React Native, and native technologies**—delivering consistent performance **across iOS, Android, and web platforms.** Our agile development process ensures faster time to market, full transparency, and zero disruption to your existing workflows.

Dart | Flutter | React

ONE CODEBASE, EVERY PLATFORM

iOS | Android | Web

WHAT MAKES US DIFFERENT:

01

Cross-Platform Experts

One codebase, multiple platforms—saving time and cost

02

Pixel-Perfect UI/UX

Custom, modern interfaces that your users will love

03

Seamless Backend Integration

REST, GraphQL, Firebase, and more

04

Continuous Support

Post-launch updates, maintenance, and scalability

05

Enterprise-Grade Security

Built-in security best practices from day one

BANKING

ATM Switch Solutions & Financial Automation Services

Our suite of **ATM Switch-Based Solutions** helps financial institutions gain deep operational visibility, streamline reconciliation, and automate reporting—enhancing both performance and compliance. From real-time log analysis tools to custom web platforms, we offer full-cycle development and support tailored for banking-grade reliability.

We specialize in designing **intelligent ATM switch log analyzers,** web dashboards, and **automated reconciliation engines** that integrate with Core Banking Systems, ISO8583, HSMs, and leading switch platforms. Our platforms enable precise monitoring, intelligent alerting, and data-driven decision-making for financial institutions.

INTEGRATES WITH

- Core Banking Systems
- ISO8583
- HSMs
- Leading switch platforms

WHAT MAKES US DIFFERENT:

01

Intelligent Log Analysis Engines

Decode and correlate multi-threaded switch logs in real time

02

Automated Reconciliation & Reporting

Match transactions across banks, switches, and settlement files with audit-ready accuracy

03

Bank-Grade Security & Compliance

Full encryption, access control, and compliance alignment (PCI-DSS, NIBSS, etc.)

04

Tailored ATM Web Portals

Intuitive dashboards for switch monitoring, transaction tracking, and management insights

Our Products & Platforms

Eight platforms. One talent partner.

01
TrustLayer
PDPA management platform

02
VCMP
Consent management platform

03
VDOCTOR
Application testing automation

04
EJ Analyzer
ATM transaction analytics

05
DAPI
Active Directory and HR automation

06
Logique
Transaction timeout monitoring

07
Marine Analytics
Maritime analytics and prediction

08
VIZUAL I
Custom workflow automation

09
IT Staff Augmentation
Engineers, developers, project managers

PRODUCT 01 · PRIVACY & COMPLIANCE

TrustLayer

Personal Data Protection Management Platform

TrustLayer is our Personal Data Protection Act (PDPA) management platform. It brings privacy governance, personal data management, compliance monitoring and risk assessment into one workflow-driven system built for regulated enterprises.

PDPA | Governance | Risk | Compliance

Built for regulated enterprises

One workflow-driven system for privacy governance

Privacy governance

Define roles, policies and accountability for personal data across the organization.

Personal data management

Keep a clear view of what personal data is held, where it sits and how it is used.

Compliance monitoring

Track compliance posture continuously against PDPA obligations and internal policy.

Risk assessment

Identify, score and prioritize privacy risks so remediation targets what matters.

Regulatory compliance workflows

Structured, auditable workflows for requests, reviews, approvals and reporting.

PDPA

Personal Data Protection Act

VCMP

Consent Management Platform

VCMP gives organizations one place to collect, manage and prove consent. It turns every consent decision into a governed, traceable record, from first capture through the full lifecycle, with integration into the systems that act on personal data.

1 **COLLECTION AND PREFERENCES**

Capture clear, granular consent across channels and give individuals simple controls to review and change their choices at any time.

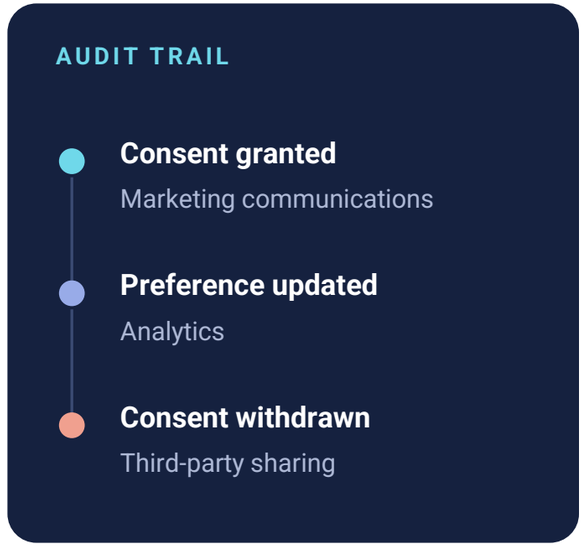

2 **LIFECYCLE TRACKING AND AUDIT TRAILS**

Every grant, update, renewal and withdrawal is recorded, creating a verifiable history that supports audits and regulatory inquiries.

3 **INTEGRATION CAPABILITIES**

Connect consent decisions to the websites, applications and enterprise systems that act on personal data, so choices are honored everywhere.

ILLUSTRATIVE

1	**Consent collection**	Capture consent at every touchpoint
2	**Preference management**	Let people set and change their choices
3	**Lifecycle tracking**	Follow each consent through its lifecycle
4	**Audit trails**	Keep a complete, verifiable record
5	**Integration**	Connect consent to your systems

PRODUCT 03 · QUALITY ASSURANCE

VDOCTOR

Application Testing Automation Platform

VDOCTOR automates the testing of web and mobile applications. It runs repeatable test workflows, executes them at scale and identifies defects early, so quality assurance becomes faster, more consistent and less dependent on manual effort.

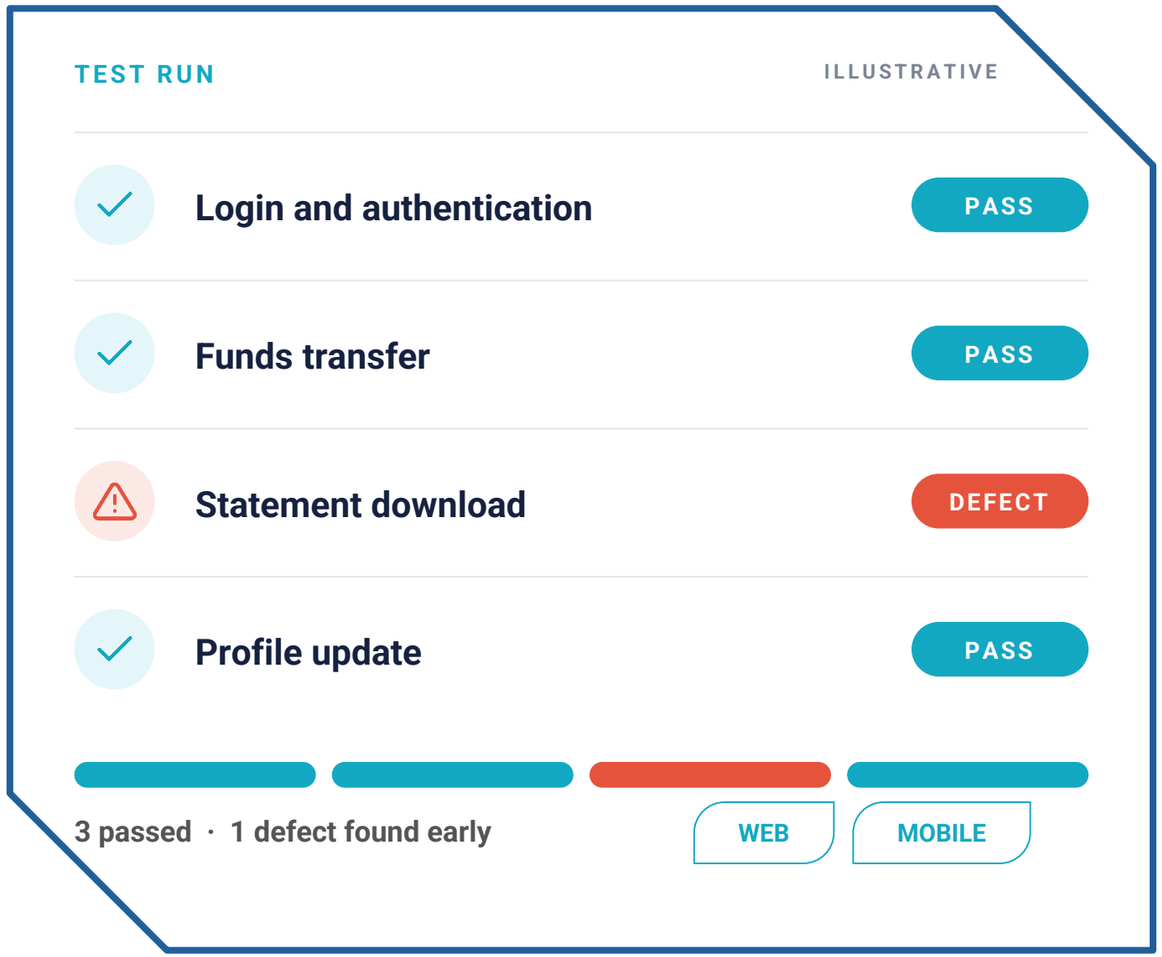

Automated test workflows
Repeatable, scripted

Quality assurance
Confidence per release

Test execution
Web and mobile suites

Defect identification
Surface issues early

Testing efficiency
Faster test cycles

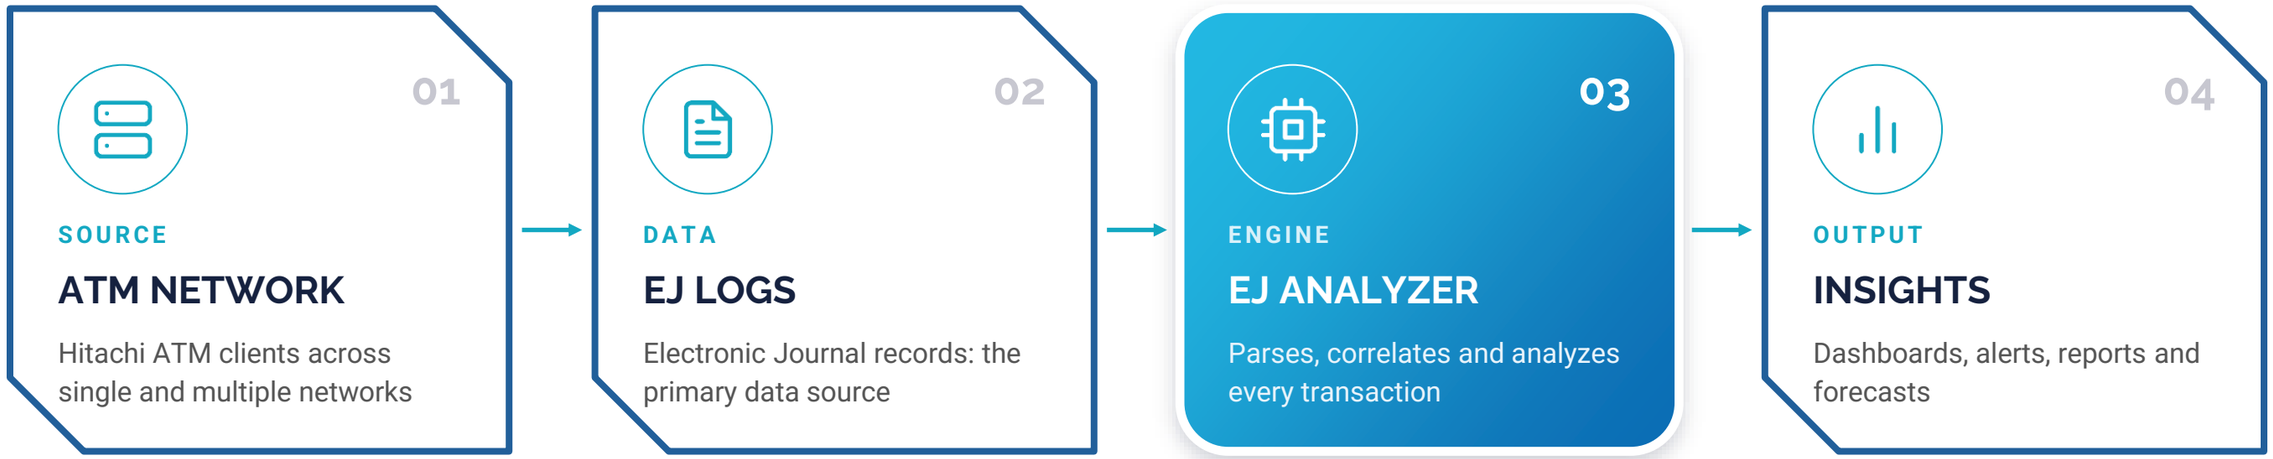

PRODUCT 04 · ATM ANALYTICS

EJ Analyzer

ATM Transaction Analytics and Behavior Analysis

EJ Analyzer turns Hitachi ATM client Electronic Journal (EJ) logs into a clear, network-wide view of transaction behavior, revealing patterns, anomalies and recurring issues across individual ATMs and entire ATM networks.

REVEALS: Patterns | Anomalies | Recurring issues

SOURCE LOGS: Hitachi ATM client | EJ logs

PRODUCT 04 · ATM ANALYTICS

EJ Analyzer

From every transaction to network-wide patterns

01

Transaction-level analysis

Examines each transaction recorded in the EJ logs, across single ATMs and entire ATM networks.

02

Behavior and patterns

Behavioral analysis identifies how transactions typically flow and highlights patterns that stand out.

03

Multi-ATM analytics

Data analytics across multiple ATMs and ATM networks, in one consolidated view.

04

Monitoring and anomalies

Transaction monitoring, anomaly detection and operational insights that surface problems as they emerge.

05

ATM performance

ATM performance analysis and identification of recurring transaction issues across the estate.

06

FORECAST

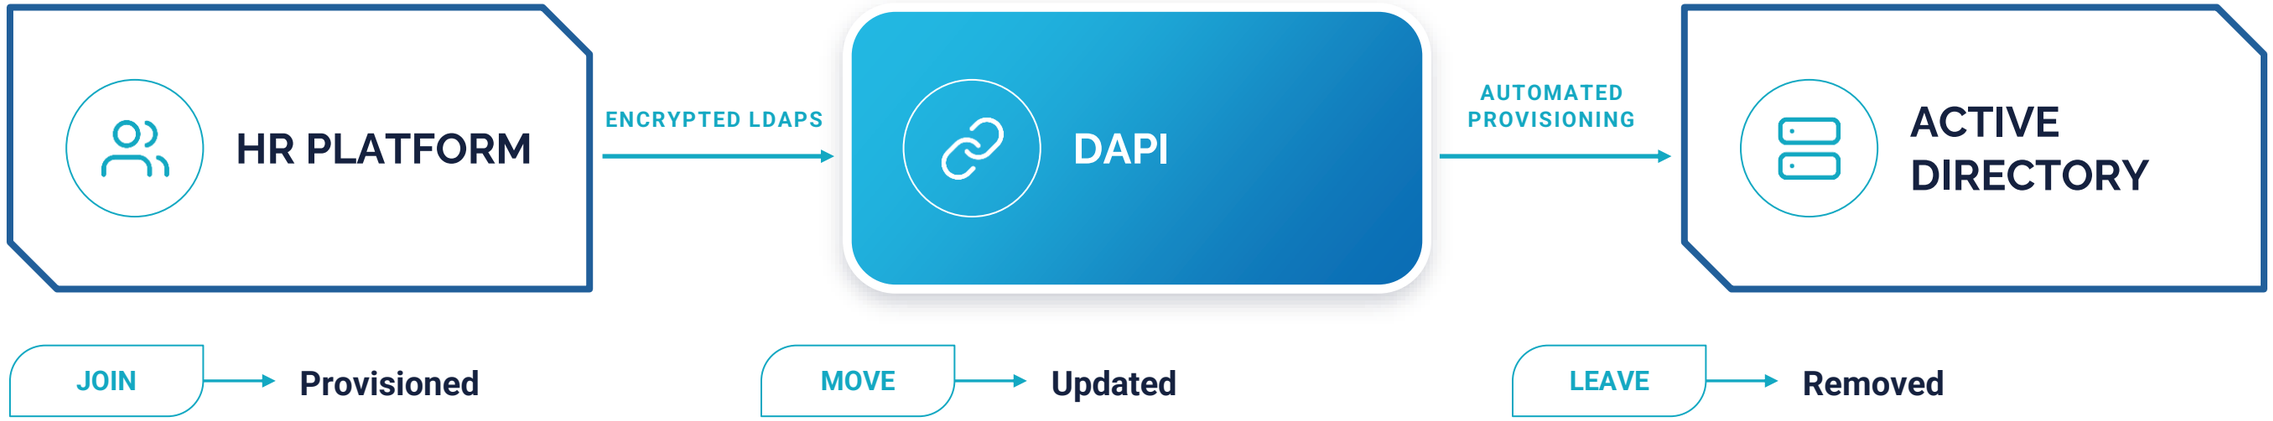

Reporting and prediction

Data-driven reporting and predictive analytics that support confident operational decisions.

DAPI

Active Directory and HR Automation

DAPI automates the Active Directory (AD) and Human Resources processes that keep access accurate. Accounts are provisioned, updated and removed as people join, move and leave, through a secure LDAPS API and without manual hand-offs.

CAPABILITIES

- User lifecycle management
- Account provisioning
- Access management
- HR workflow automation
- Operational efficiency

Logique

Transaction Timeout Monitoring System

Logique is a transaction timeout monitoring system developed for Hitachi systems. It gives operations teams clear visibility of how transactions progress, where they stall and which exceptions need attention, improving oversight of transaction processing.

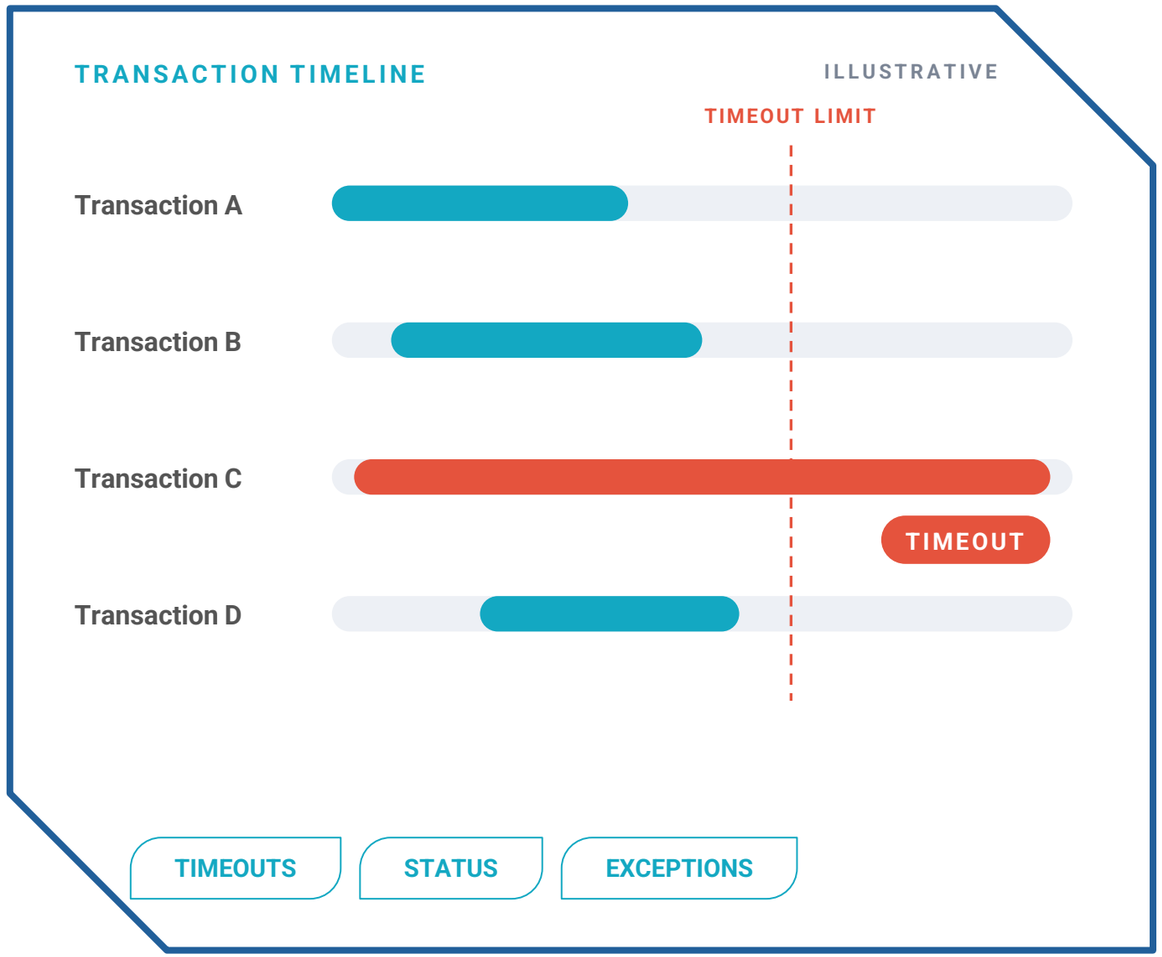

Timeout monitoring
Spot transactions that run long

Status analysis
Track how transactions progress

Operational visibility
A clear view of processing health

Exception identification
Flag failures for quick action

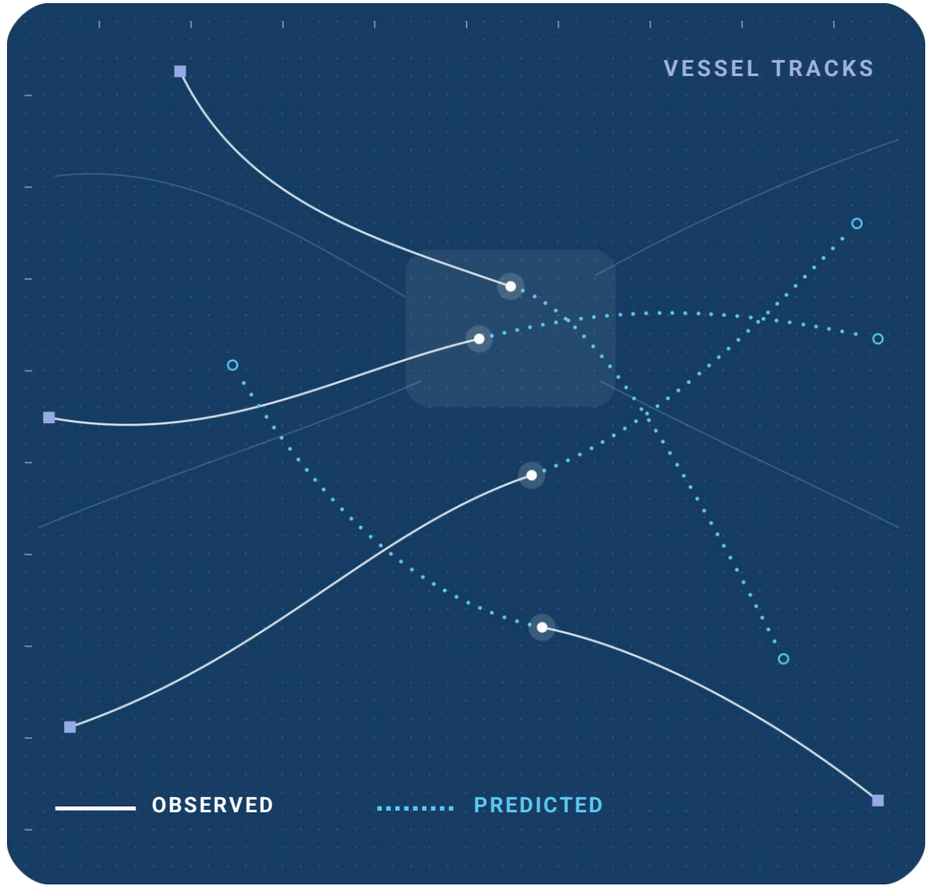

Improved monitoring
Oversight of processing systems

PRODUCT 07 · MARITIME INTELLIGENCE

Marine Analytics

Maritime Data Analytics and Prediction

Marine Analytics integrates marine traffic management systems with advanced data analytics and predictive engines, turning vessel movement data into operational insight and forward-looking intelligence.

Traffic data | Forecasting | Trends

HOW IT WORKS

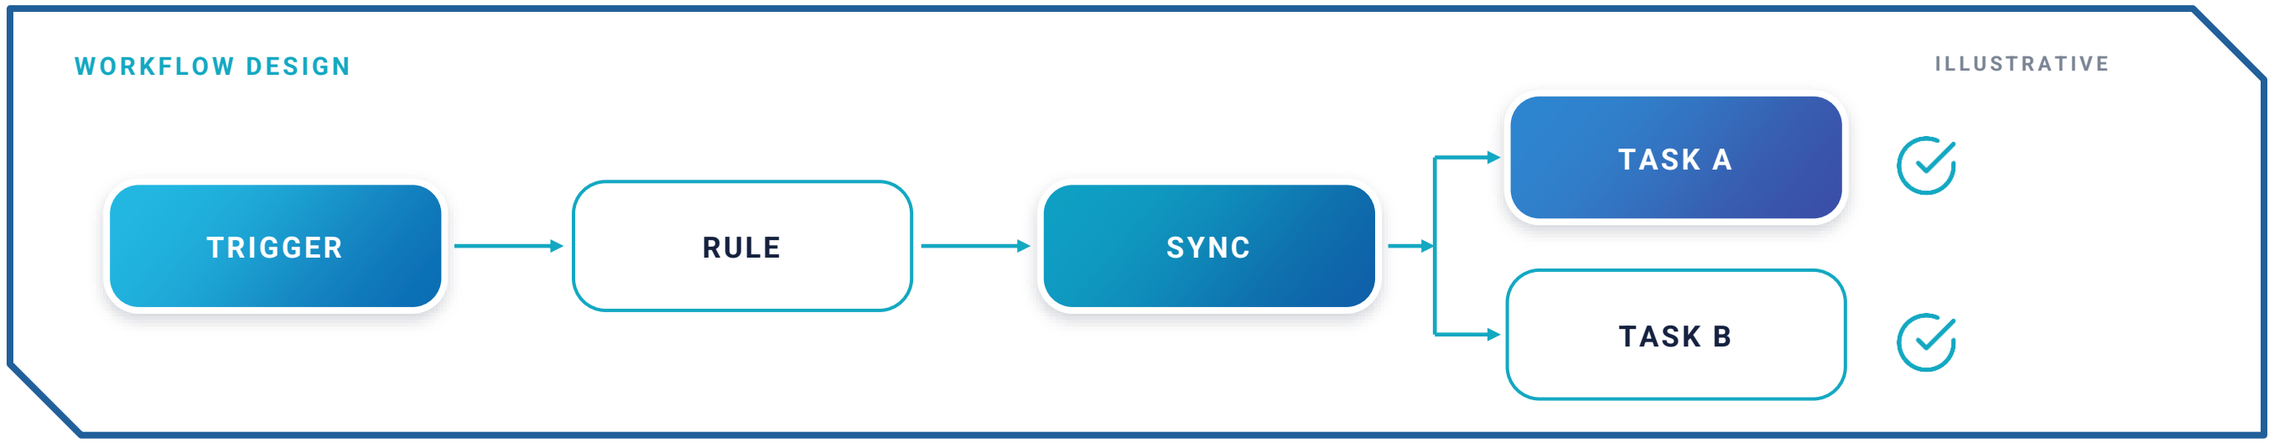

1. **Data integration**
   Marine traffic data integrated and consolidated
2. **Movement analysis**
   Maritime movement and traffic patterns
3. **Predictive analytics**
   Forecasting powered by predictive engines
4. **Operational insight**
   Data-driven insights and reporting
5. **Decision support**
   Trend identification and decision-support intelligence

PRODUCT 08 · WORKFLOW AUTOMATION

VIZUAL I

Custom Workflow Automation Platform

VIZUAL I lets organizations design and run automation workflows around their own processes, connecting systems, applying business rules and orchestrating tasks so that repetitive manual work is reduced.

- Workflow design
- Process automation
- System integration
- Business rule automation
- Task orchestration
- Fewer repetitive manual tasks

OUR ACHIEVEMENTS

OFFICIAL IT PARTNER – KAWAALI 2025

2025

We were honored to serve as the official IT partner for **KAWAALI 2025**, a landmark event held at **Port City, Colombo**, on **June 13th–14th, 2025**. This massive international event brought together innovation, culture, and technology, and we ensured seamless tech infrastructure, security, and connectivity throughout the venue.

FIRST IN-HOUSE EMAIL & MICROSOFT SUBCOMPONENT MIGRATION TOOL

1ST

We proudly developed and own **Sri Lanka's first fully in-house migration solution** for **emails and Microsoft product subcomponents**, enabling organizations to shift their workloads with complete control, security, and flexibility—without relying on external tools.

AI-POWERED INNOVATIONS

AI

We continue to lead in AI-driven development by building and owning a **range of intelligent business automation tools**, including:

- **Business Chatbots** for customer engagement
- **AI Assistants** for internal operations and support
- **Predictive tools** for analytics and reporting

SEAMLESS & SECURE MIGRATION PARTNER – SAMPATH BANK

BANKING

Recognized as the **most secure and seamless cloud migration partner** for **Sampath Bank**, one of Sri Lanka's largest financial institutions. We supported the successful transition of the **country's largest Microsoft ecosystem footprint**, with zero downtime and maximum data integrity.

TRACK RECORD

OUR ACHIEVEMENTS

SECURE WEB LAYER & PROXY MANAGEMENT SYSTEM	A robust security layer for web applications, providing proxy services, traffic monitoring, and customizable security policies to protect applications from threats and ensure secure access.
ADAPI AD – HR INTEGRATION VIA SECURE LDAPS API	A secure API system that integrates Active Directory with HR platforms, leveraging LDAPS for encrypted communication, automated provisioning, and synchronized user management.
TTUM RECONCILIATION & AUTOMATION ENGINE FOR BANKS	An automated reconciliation solution that validates bank transactions, generates exception reports, and streamlines TTUM processing—reducing manual effort and ensuring accuracy.
ATM LEDGER & E-JOURNAL ERROR ANALYSIS ENGINE	A powerful monitoring and analytics platform that tracks ATM transactions, analyzes e-journal logs, detects errors, and provides real-time dashboards for operational efficiency and faster issue resolution.
EMAIL GATEWAY LOG ANALYZING SYSTEM	A powerful platform that monitors and analyzes email gateway logs in real time, helping businesses track message flow, detect anomalies, and identify security threats. The system provides detailed dashboards, automated reports, and alerts—enabling IT teams to maintain email security, compliance, and operational efficiency.
